

# IRONCLAD

## PDF Tutorial Guide

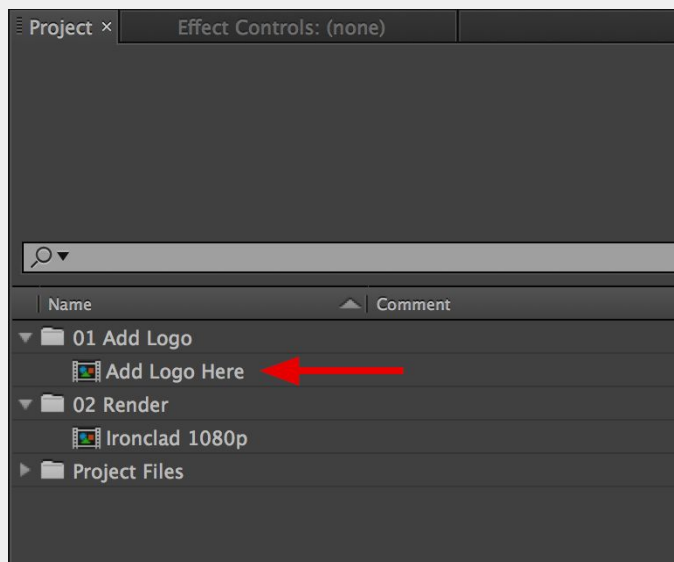

### Project Files

Inside your download, you'll find two project files - one for the bronze color and one for the silver color. Decide which color you want and double click the corresponding project file.

### Step 1: Add Your logo

Import your logo into the project. Your logo must have a transparent background in order to work. We recommend a single colored logo for best results. Make sure your logo isn't black, otherwise it won't show up due to the black background in the animation.

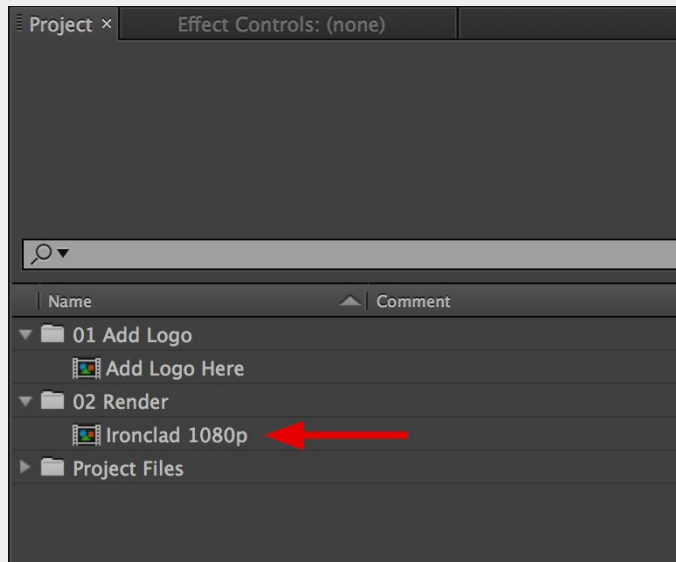

Once your logo is imported, locate the folder called **01 Add Logo** in the project panel. Double click the comp inside called **Add Logo Here**.

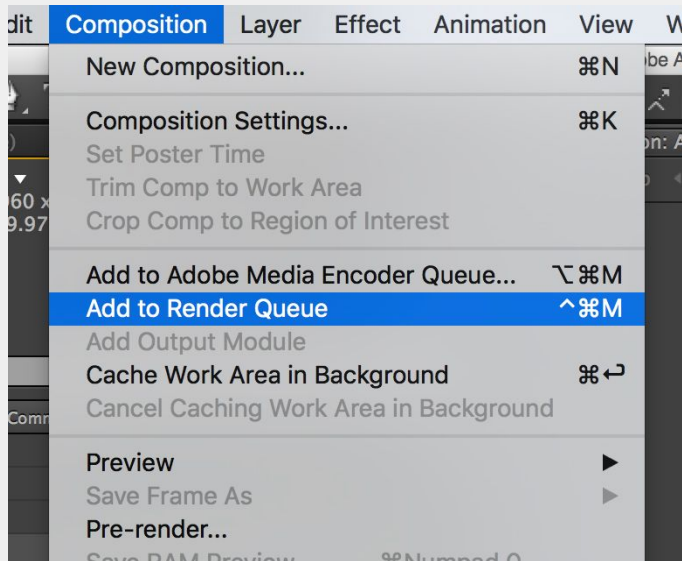

Drag and drop your logo from the project panel onto the comp's canvas. Scale your logo if needed.

### Step 2: Render the Animation

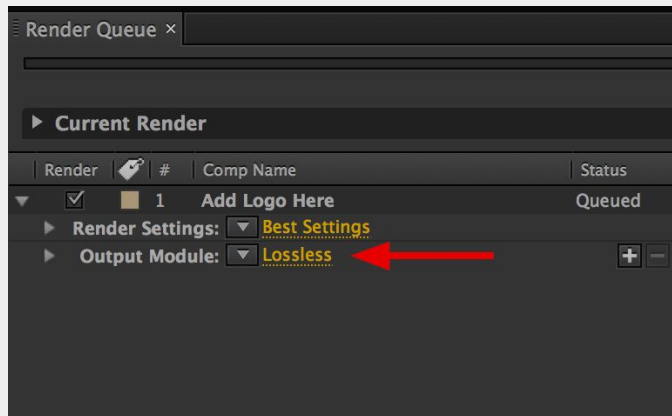

Locate the folder called **02 Render** in the project panel. Double click the comp inside called **Ironclad 1080p**.

You can review the animation within this comp. Once you're happy with the results, highlight the comp within the project panel and navigate to **Composition > Add to Render Queue** in the top menu bar.

The Render Queue window will pop up. If you're familiar with changing render settings, hit the yellow text next to the **Output Module** to choose your desired render settings. Otherwise, hit **Render** on the right hand side.

Choose your settings via the Output Module if desired, otherwise hit **Render** on the right hand side.

---

## Project Files

This folder contains pre-compositions, mattes, and assets which are used in the project. Do not modify this folder or any of the contents.

## Video Resources

I'm getting a **missing files** error when launching the project:

<https://www.rocketstock.com/support/replacing-missing-footage/>

I'm not sure how to **add a logo** to the project:

<https://www.rocketstock.com/support/adding-a-logo-in-your-template/>

I'm not sure how to **render my project**:

<https://www.rocketstock.com/support/rendering-your-project/>

**(Please Note:** the projects shown in these videos are different than Ironclad, but the process of each are similar or the same.)

## Additional Help

With highly technical products such as After Effects templates, we receive a large volume of support requests that require detailed responses. This means that unlike our paid products, **we currently do not offer technical support with RocketStock freebies.**
