

Click

A Free After Effects Template

Getting Started

Launch the aep project file inside the download folder. Within the project panel, you'll find 3 folders. What are these folders?

Step 1: Edit: Within this folder is where you'll add your logo and edit the tagline title.

Step 2: Render: Inside this folder are the 3 versions of the logo reveal that you'll render after customization.

Project Files: This folder houses comps and assets used in the project. Do not modify this folder.

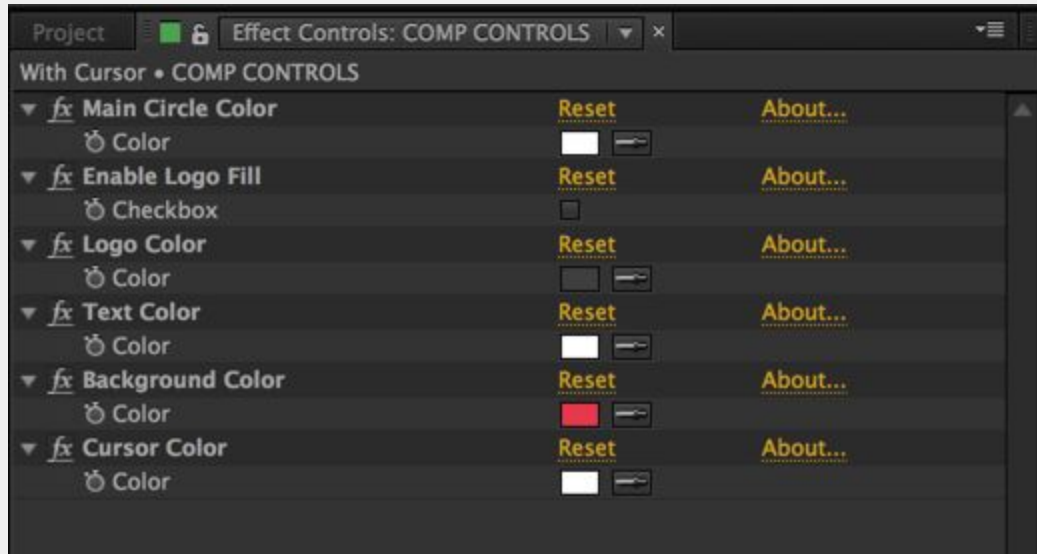

Using the Template

Add Logo: Double click the 'Edit Logo' comp within the 'Step 1: Edit' folder. Delete the default RocketStock logo in this comp and add your own logo. Your logo must have a transparent background in order for it to work in the template.

Edit Tagline: Double click the 'Edit Tagline' comp and customize the text layer. (layer #2)

Change Colors and More: Within the 'Step 2: Render' folder are 3 comps which are the 3 animations you'll render. You can change colors and more within each comp independently.

Double click one of the comps and highlight the green layer called 'COMP CONTROLS'. If you navigate to the effects controls panel, you'll find color controls for the background, text, and logo. If you're using a logo that's multicolored, make sure the 'Enable Logo Fill' is disabled.

Rendering: Once you've customized your logo reveal, it's time to render. Highlight one of the 3 comps within the Render folder and navigate to Composition>Add to Render Queue in the top menu bar. Choose your desired codec and settings, then render.

Additional Help

With highly technical products such as After Effects templates, we receive a large volume of support requests that require detailed responses. This means that unlike our paid products, **we currently do not offer technical support with RocketStock freebies.**
