65 Free

Bullet Sparks

Free Video Editing Assets

Getting Started

Import Sparks

These free spark elements are designed to work in every major NLE. Simply go to File > Import in your nonlinear editor of choice to bring these assets into your project.

One imported, overlay these sparks onto your footage or composition. Then change the blend mode to Screen. You can layer as many sparks as you want into any given project.

Terms of Use & Support

All of the freebies are 100% free to use. However, you may not distribute or sell the templates in any way without prior authorization from RocketStock.

With highly technical products such as After Effects templates, we receive a large volume of support requests that require detailed responses. This means that unlike our paid products, **we currently do not offer technical support with RocketStock freebies.**
