

Animated Font Template

A Free After Effects Template

ROCKETSTOCK

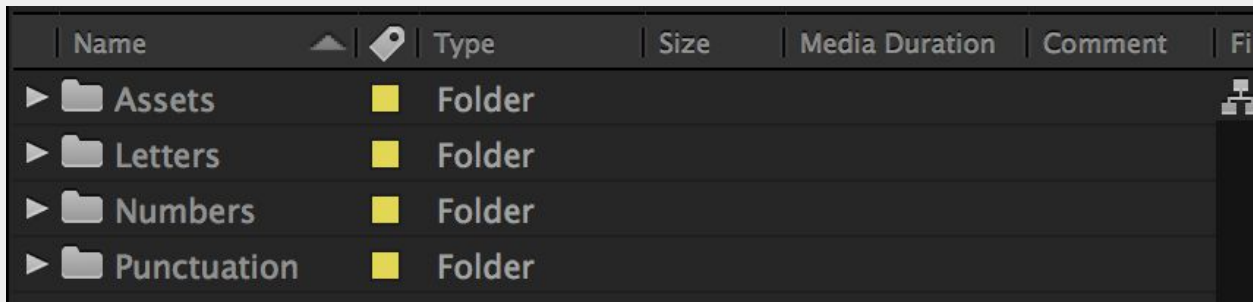

Getting Started

Download and Unzip the Template

Your files will download as a .zip file. Simply unzip and double click on the After Effects project file. If you are reading this document, you have probably already completed this step.

Open the Project

The project is optimized for After Effects CC, CS6, and CS5.5. In the project panel, you will see four folders:

Name	Type	Size	Media Duration	Comment	Fi
▶ Assets	Folder				
▶ Letters	Folder				
▶ Numbers	Folder				
▶ Punctuation	Folder				

You only need to worry about the Letters, Numbers, and Punctuation folders.

- Letters: All 26 Letters of the alphabet.
- Numbers: All single digit numbers 0-9.
- Punctuation: 7 basic animated punctuation marks.

Using the Template

Simply drag each respective character's composition down into a new 'master' composition. Because of the way After Effects processes nested compositions, you can bring down as many compositions as you like into the 'master' composition.

After you have brought down the compositions, you can now scale each letter and move them into the appropriate location. Each letter composition can be adjusted and modified like any other layer in After Effects, so feel free to mess around with color, stylization, and motion blurs.

Note: You can open the animated font template in another After Effects template.
